PROJECTS

PERSONAL EXPENSE TRACKER ([Try It](#)).

Developed a personal expense tracker web application using Oracle APEX (Low-Code Development) for the frontend and Oracle Database for backend data management. Designed an intuitive user interface to add, categorize, and display expenses, enabling effective financial management. Leveraged Oracle APEX's built-in features for data visualization to summarize expenses by category. Utilized SQL for efficient data storage and retrieval, gaining hands-on experience in Oracle APEX development and database management.

INVENTORY SYSTEM ([Try It](#)).

Developed an Inventory Management System using Django and SQLite to manage product, supplier, buyer, and order data efficiently. Implemented features for stock tracking, order processing, and delivery management. Utilized Django's backend framework with SQLite for a lightweight, serverless database solution.
